

SANKALP INTERNATIONAL SCHOOL

संकल्प

INTERNATIONAL SCHOOL

A SCHOOL THAT PERFECTLY BLENDS INTERNATIONAL EDUCATION WITH INDIAN TRADITIONS!

Our Students Become

CITIZENS OF THE WORLD!

Managing Director
Dr. Bipinbhai Adroja (M.Sc., B.Ed., B.P.Ed., Ph.D.)

Do we know what the world will look like in upcoming few decades ? This is difficult to say; we see trends in business, phenomena in relationships, environmental changes and so on. The world is changing more rapidly than ever. With a change in circumstances, an urgent change in educational practice is needed. Should we still prepare our children as is typically done? Are those the skills they need to urgently develop for a changing future? We believe that children need guidance in developing and maintaining qualities that will serve them well now and in the future. Qualities that will allow them to become Independent, Self-Reliant, Flexible, Responsible, Logical, Respectful and Open-Minded People. It is our Sankalp to deliver all these.

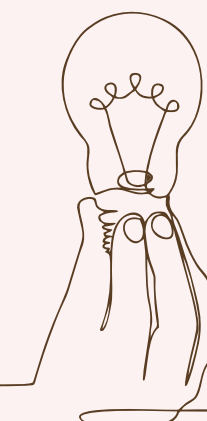

“Education is a key to the door of all the dreams”

Chairman
Mr. Ramjibhai Kakadiya

Vision

Our school aim to be an institute of “High Ethical Standard which create an effective learning environment and is absolutely free from fear.”

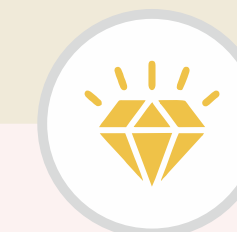

Mission

To develop in children a sense of integrity, compassion for others and courage to act on their beliefs. To create life long learners. To promote a safe, orderly, caring and supportive environment in which child can prosper.

Goal

We are proud to say that the goal has been deeply ingrained in all who have been associated with the situation. The school has the best staff and aims for best result in the region.

Award@Sankalp

2024-25 : We are felicitated with Gold Award by Shri Acharya Devvrat Hon'ble Governor of Gujarat State.

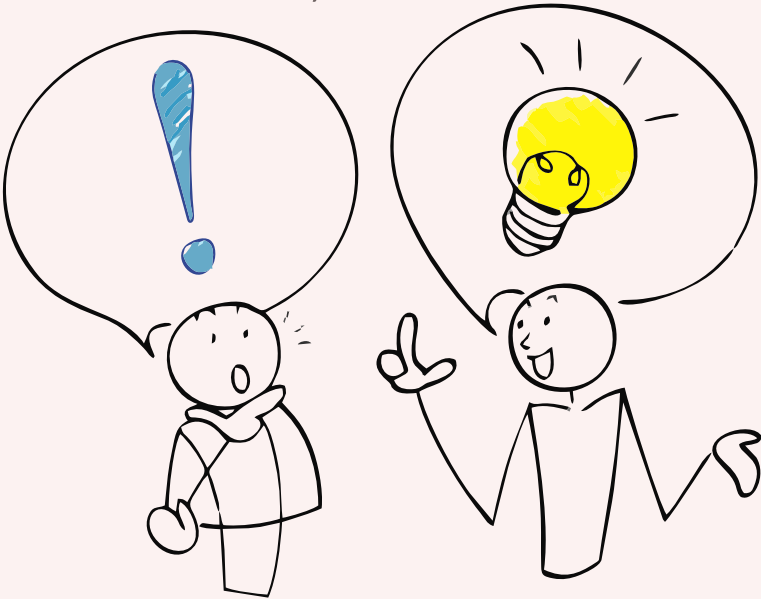

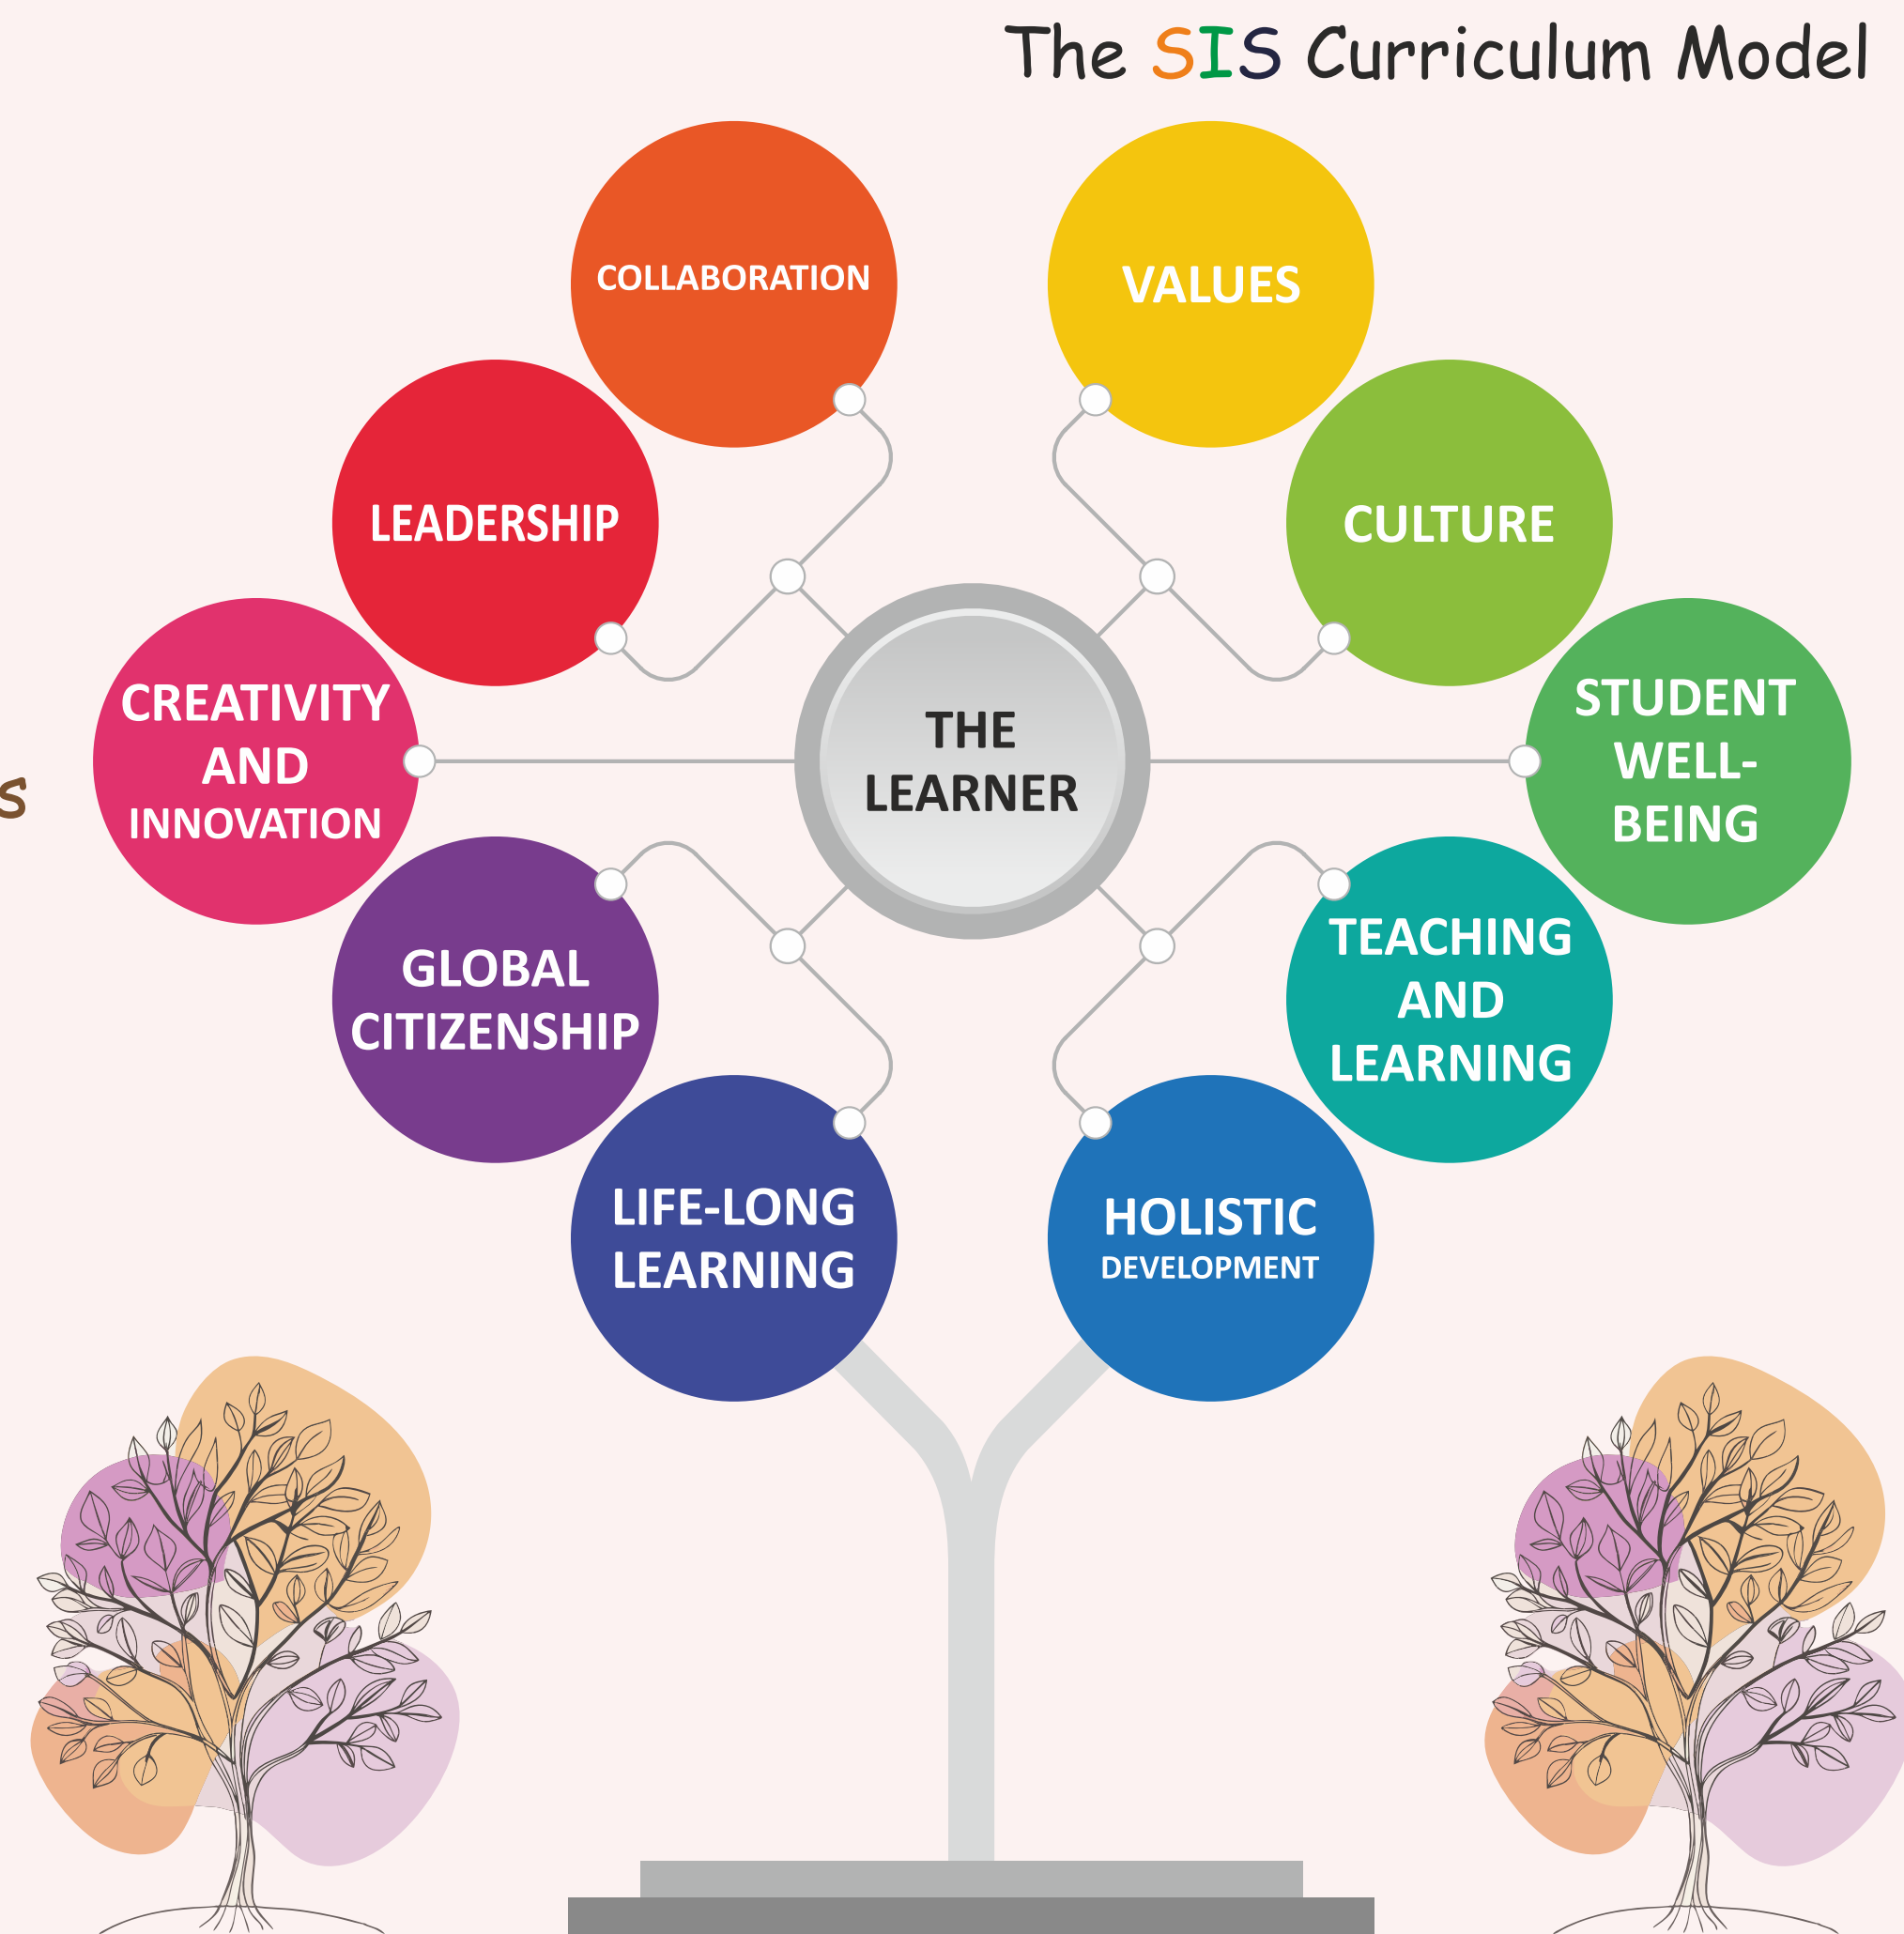

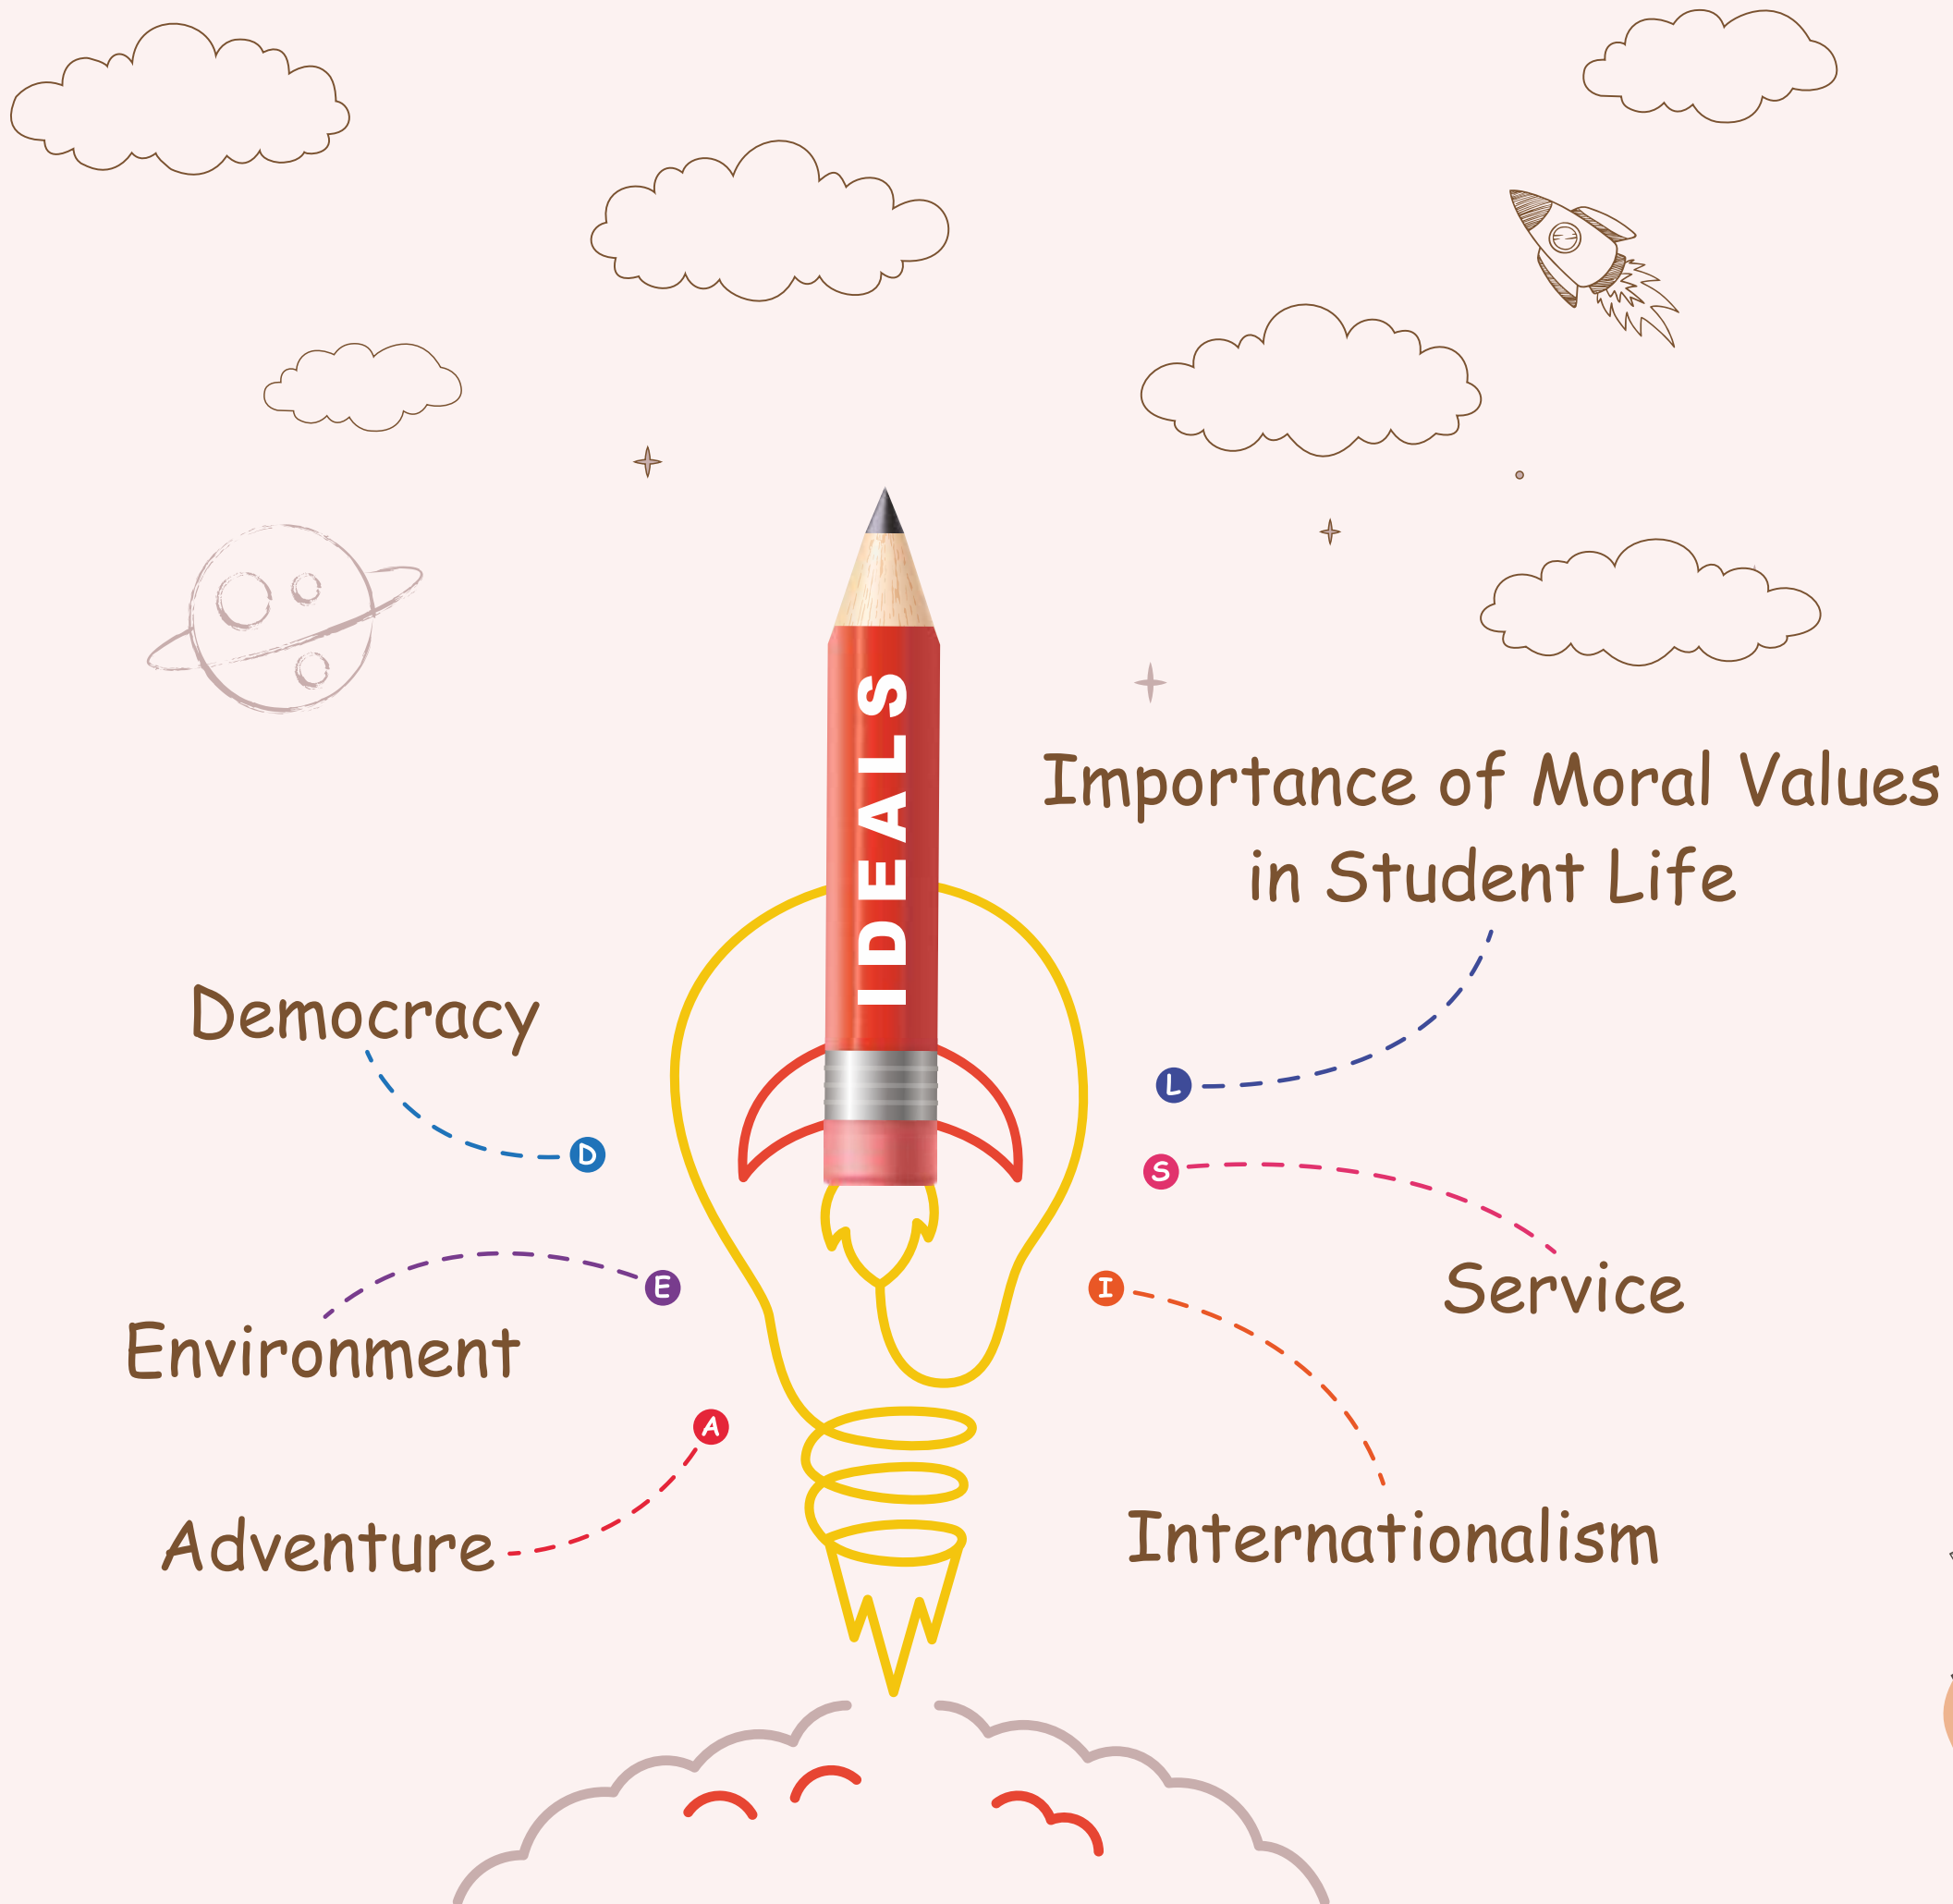

WHY SANKALP ?

Sankalp is recognised as a well Technophile Showcase School, thus joining a select league of schools globally for their vision and innovation in teaching, learning, and preparing students for the future. The student body, comprising 5500 students, reflects the cultural diversity of India.

Innovative teaching approaches and well-equipped teachers, the pedagogical approach and capable, qualified teachers who resort to continuous professional development are important deciding factors for parents while choosing the best school for their children in Gujarat.

- INFRASTRUCTURE :** Our infrastructure is beyond the imagination, it is beautifully designed by keeping students interest.
- EXTRA-CURRICULAR ACTIVITIES :** Our school has plenty of extracurricular activities.
- OUR EDUCATION SYSTEM :** School has a high student to teacher ratio.
- SCHOOL RESULT :** it seems that the teachers are very good and child will get a very good atmosphere to study here
- SCHOOL HAS A VERY HIGH REPUTATION :** Our School is considered good in terms of co-curricular and sports activities too which is a must for children in today's world.
- DEVELOPMENT OF CORE QUALITIES WITH CONSISTENT ACADEMIC RESULTS :**
A school which credits itself to consistently high academic outcomes is often high up on parents’ wish lists. Although several other factors come into play, this criteria is an important one as it reflects the school’s overall efforts. Parents expect these reputed schools to deliver on all core qualities such as good reading and maths abilities, provide excellent exposure to science and technology, and extra-curricular activities.
- INNOVATIVE TEACHING APPROACHES AND WELL-EQUIPPED TEACHERS :**
The pedagogical approach and capable, qualified teachers who resort to continuous professional development are important deciding factors for parents while choosing the best school for their children. A variety of approaches or curriculums are used by schools, with some perceived to be more effective than others. Even if the school follows a conventional state-prescribed or national syllabus, schools that use innovative teaching methods are increasingly sought after.
- FUTURISTIC LEARNING METHODS THAT GO BEYOND JUST TEXTBOOKS :**
‘Good marks’ are a thing of aspirations any day. There is an equal need for problem-solving skills, creative and critical thinking, confidence to speak out, collaboration and digital skills. An informed parent makes sure to pick a school that works with proven and research-based academic programs such as encourages the development of future-focused life skills.
- EXPERIENTIAL LEARNING, AND NO MORE ROTE LEARNING :**
We want to educate our kids in schools that encourage active classrooms, where silencing is no more the norm. They want kids to learn concepts in an exciting, engaging manner rather than rote learning. Schools should encourage students’ participation in classes, asking questions, active discussions and problem-solving individually and in groups.
- A FOCUS ON EXTRACURRICULAR ACTIVITIES :**
The importance of extra-curricular activities in a child’s development is undebatable. A school which provides ample opportunities and facilities for this is hence highly regarded and preferred. Some parents hunt for schools with specialized Dance and Sports teachers, or any particular area which their children are keen on. Well-maintained facilities like a fully equipped music room, tennis courts or basketball fields, and qualified coaches are a definite plus when it comes to decision making.
- SAFE ENVIRONMENT :**
Safety is a big concern and a very relevant criterion nowadays, with increasing instances of bullying, harassment, and drug abuse in schools all over the world. Parents look for schools with a pleasant environment created by teachers and staff, not a hostile one. They seek to understand the security measures taken, and the discipline policies that the school can enforce if there is an untoward incident. From the school’s perspective, any shortcoming in the safety aspect affects the entire institution, leads to bad press and a bad reputation which is difficult to erase. So schools need to take strict measures to maintain a safe environment for children and the staff.
- GOOD PARENT – TEACHER – MANAGEMENT COMMUNICATION :**
We always available to our parents for child’s better growth.

संकल्प

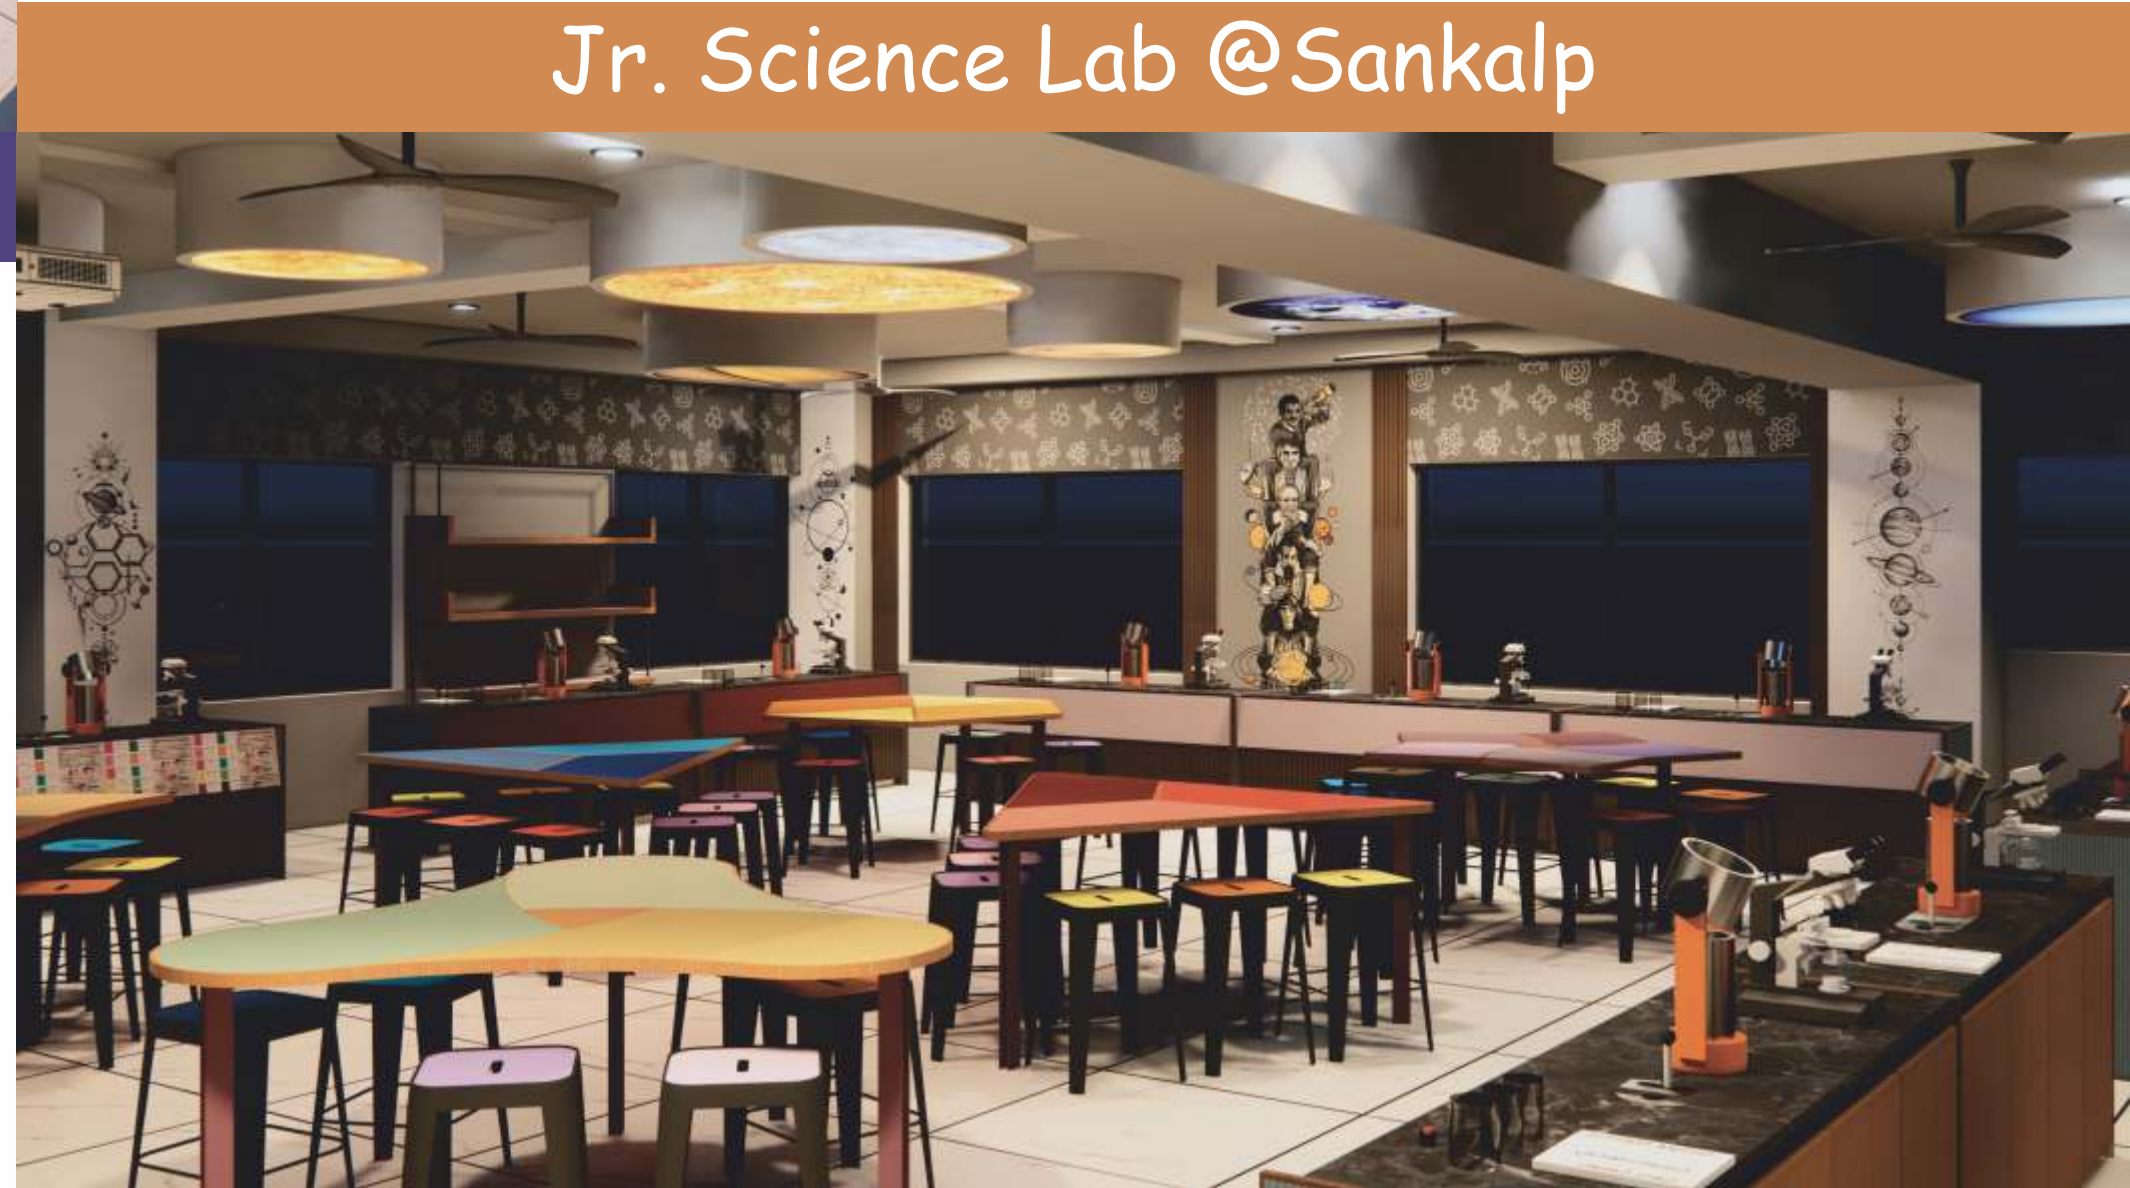

Jr. Maths Lab @Sankalp

- Here students would get hands-on experience to understand the basic concepts of mathematics and scope for new innovations.
- Children perform mathematical experiments, play mathematical games, solve mathematical puzzles and getting involved in other activities.
- It enables the students to verify or discover several geometrical properties and facts using models or by paper cutting and folding technique.
- It helps the students to build interest and confidence in learning the subject.
- It enables the teacher to demonstrate, explain and reinforce abstract mathematical ideas by using concrete objects, models, charts, graphs, pictures, posters etc.

- We offer various opportunities to students to think creatively, develop techniques, and explore their interests. Therefore, we have a science lab, which is essential for students to learn and explain scientific facts and theories. With this view, Sankalp offers a well-equipped science laboratory for students to understand different concepts of science.
- A science lab allows kids to carry out science experiments with various scientific methods and instruments, while also having fun. Here are some of the benefits of a science lab for students at Sankalp.
- Helps students formulate their own ideas • It fosters curiosity • Self-directed learning
- Students become more focused • Develops critical analysis skills.

Jr. Science Lab @Sankalp

Grooming Studio

- We believe that grooming session is also important to learn in school because it can help students develop a sense of well-being and contribute to their flourishing lives. It can also help students develop their aesthetic abilities, which can include:
 - Perceiving career
 - Being able to participate in activities that develop creative abilities
 - Being able to evaluate aesthetic qualities using formed evaluation criteria
 - Conducting experiments, having conversations, or performing monologues.
- Here students feel safe and raise their expectations, self-esteem, and connection to others. This can lead to greater focus, engagement, and enjoyment.

Language Lab

- English is one of the most people speak more frequently on all sides of the world. The majority of people are aware of the English language & it is an ESL – (it is a second language).
- We focus on students (LSRW), soft, and life skills in English by using English language lab software in schools. English Language Labs help students get a fundamental knowledge of the English language while also expanding their understanding of other languages. Benefits like...
- Learning a new language improves students' brainpower.
- Helps students practice speaking, listening, reading, writing, phonetics, vocabulary, and soft skills.
- Exposes learners to cutting-edge technologies and activities.
- Features a feature-rich software structure for fast English language learning. The primary function of the language laboratory software is audio-video recording, grammar checking, level, daily activities, monitoring and a lot more...

Music Hall

The inclusion of music within educational curriculum has proven to be instrumental in fostering holistic development among students. From boosting cognitive skills and academic performance to nurturing emotional well-being and social growth, the benefits of music in our school extend beyond the realm of entertainment. Educators recognize these advantages and strive to integrate comprehensive music programs into the educational journey of every student. By doing so, we can create a learning environment that celebrates the transformative power of music while unlocking the full potential of our young minds. They can build their career too.

3D Room

Modern era is the era of virtual world Sankalp International School holds their heads high in the field of advanced technology. We believe if one wants to teach with a difference, one needs to transcend the barriers of four walls of the classroom. 3D Virtual labs are all set in the school to escort the learners to the zenith. 3D Education System is a three dimensional, fully interactive virtual reality models. 3D real time simulation environment makes a full set of interactive functions available. 3D lessons allowing the students instant access to the structures. 3D brings excitement among students; we also show them 3D movies and videos. 3D lessons allowing the students instant access to the structures. It recognises the need to build anticipation for this virtual world of learning. The feeling of awe and fascination that comes when one sees the 3D demonstration, should come across strongly in the communication to render it that wow factor.

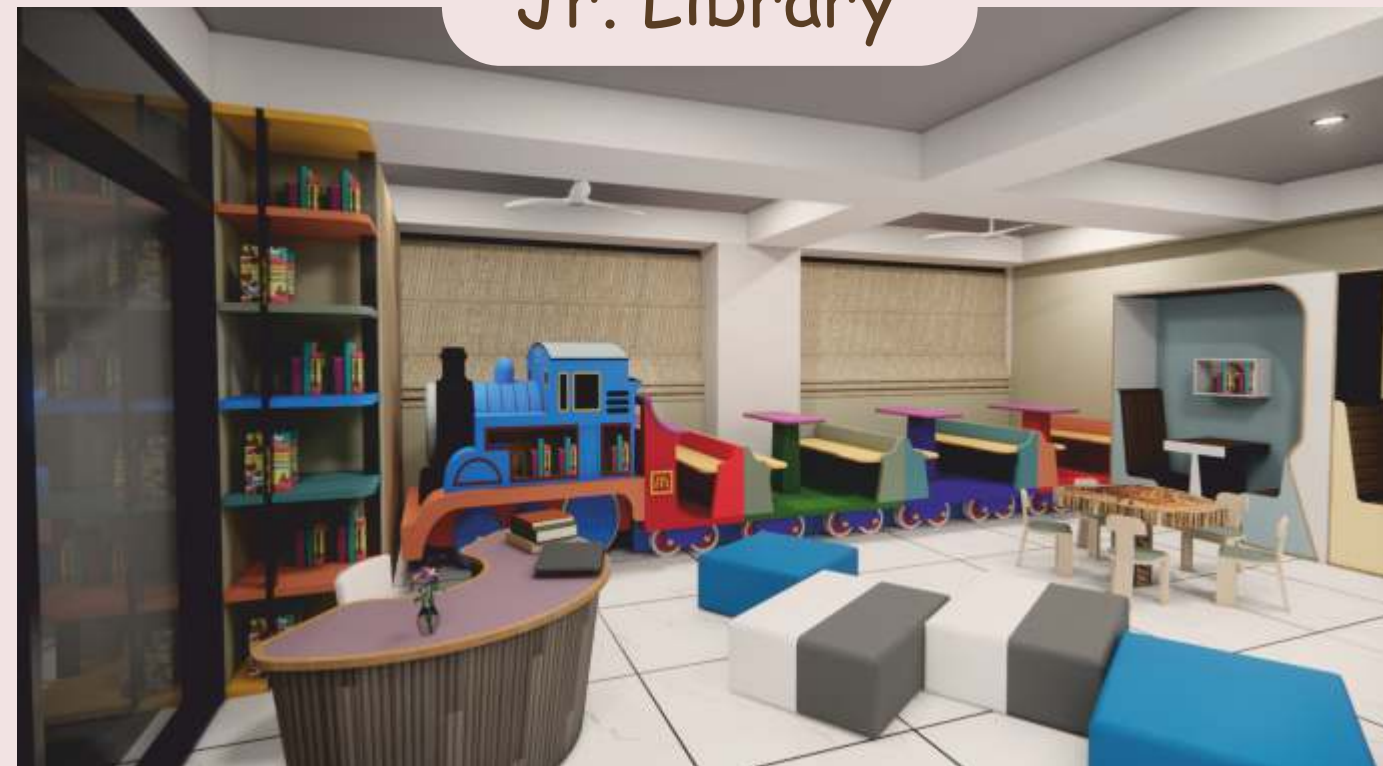

Jr. Library

Library

A school library facilitates diverse life skills, thereby enhancing personal development in young children. It is important for learning because it provides students with access to knowledge, resources, and support, and helps them develop skills and a love of reading: We have two libraries, which are very beautifully designed like nature so our kids can learn and enjoys the aura. This will help them in building their lifelong learning, personality development, reading, mentorship, access to information, authentic information and preservation of knowledge.

Let Your
Mind Wander in the
Library's Sanctuary.

Sr. Library

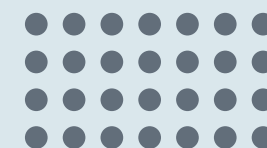

- First School in Gujarat having well-equipped Social Science Lab.
- Break up the monotony of teaching and learning
- Combine academic experience with worldly knowledge
- Provide students with options to learn better
- Increase cognitive and cooperative learning
- Improve students' understanding and creativity
- Labs are equipped with models, samples, sketches, maps, globes, videos and pictures related to history, geography, and civics topics which will help in better understanding.
- Labs can help students learn to investigate how social science is part of everyday life.

Social Sci. Lab
@Sankalp

Computer Lab
@Sankalp

In today's fast-paced world, technology has become an integral part of our daily lives. In such a scenario, computer education has become imperative for students to stay updated with the latest technological advancements. Students learn and practice computer-related skills. We provide individual computer to individual student so each student can access technology because the regular student couldn't afford and sometimes couldn't access at home. Students gained great experience with new technologies and interactive materials here. These not only prepared them for technical careers but also for the digital future that we're living in. We have individual computer for individual student.

Seminar @Sankalp

Every week our teacher's conduct Awareness Seminar on the basis of real world; we are exploring and fostering them towards real life. In this seminar, students gain knowledge of different things, how and why things happened.

Learnology @Sankalp

"Knowledge is Power" Sankalp believes that apart from study, General Knowledge has always been a very interesting subject. It gives the students a chance to enhance their knowledge of various national and international events of the world. GK plays a major role in every student's life as most of the competitive exams ask various questions based on general knowledge. Every year we designed online exam, which is based on different topics and we share reading content and our students attempt exam with the help of link. Our motto is to keeps everyone updated that helps you remain one step ahead of others and stand out from the crowd. It develops yours: • Debate Communication Skill. • Improves Decision Making. • Personality development and competitive spirit. • Improving General Knowledge.

Bhagavad Gita @Sankalp

Sankalp creates holistic environment for students and want our students should be connected with our culture and our roots. So, we have conducting two Bhagwat Gita sessions in a week to give them our religious knowledge and ancestor's history.
